A further argument against an innate FFA is that cognitive processes specializing in objects only in existence over the last two centuries such as automobiles and planes could not have been selected by evolution. Context and Cognition.

Neuroimage36,- Nature- Auditory distraction: a duplex-mechanism account. Parr, L.

There are no fixed deadlines. There are also specialized natural tasks, such as RST Corr, a and Adaption-Innovation Theory of cognitive style Kirton, both of which rest on neurophysiological bases that overlap with those on which neuro-behavioral decision theory rests and contribute to the cognitive articulation of the CNBDS hypothesis and the suggestion of meliorating action. This article was submitted to Cognition, a section of the journal Frontiers in Psychology.
