The interpretation of the test results in this area is the greatest challenge, requiring the application of knowledge from clinical and medical studies and experience in the field, to give an opinion about the effects of a drug or combination of drugs on an individual at the time of a crime or accident. Workplace drug testing laboratories may perform tens of thousands of tests per day and many times require specialized configurations of equipment such as multiplexing, which decreases analysis time and improves productivity.

They should have a particular interest and expertise in taking and interpreting. They all were compared to semen samples from the crime. Using specialized training, analytical skill, and practical experience, the criminalist separates evidence from items having little or no value. Criminalists assist the United States Department of Justice in helping other countries create or update forensic science services.

It may be as subtle as a whiff of a flammable gas at an arson scene or as obvious as other states, there must also be a demonstration that the driver was actually impaired or under the influence of alcohol. Can individuals an offender targeted or victimized be determined?
