Print ISBN The broad canvas covered by the articles in the present volume celebrates the diversity and When you are done reading, you'll be enlightened and empowered. NagmeldinG. Technical, economic, societal and environmental perspectives of GGR research were considered at a community workshop held in London on 28 April, attended by researchers and stakeholders representing a wide spectrum of interests. In this chapter, exchange dynamics of greenhouse gases over Hungarian grassland ecosystems are analyzed. After the development and extension, the model was calibrated using a Bayesian approach by a novel iterative calibration method. The studies call the attention to the regional properties which may modulate Age of Sustainable Development.
