It seems so archaic 30 years later. Edison's role in life began to change from inventor and industrialist to cultural icon, a symbol of American ingenuity, and a real life Horatio Alger story. Initially, only Ford and Firestone were to contribute funds to the project while Edison did all the research.

Edison lived here until he struck out on his own at the age of sixteen. The development and improvement of the phonograph was an ongoing project, continuing almost until Edison's death. They both did great things and awful things.

Edison's involvement in the business end of the electric industry had caused Edison sits at the table as the speaker tells about his life, he thinks back to the days of as a young man coming to New York City from Boston on an invitation from his friend and telegrapher, Bunt Cavatt Lynne Overman to come work for Ben Els Henry Travers. By the time Edison introduced his new alkaline battery, the gasoline powered car had so improved that electric vehicles were becoming increasingly less common, being used mainly as delivery vehicles in cities.
